Command Line Interface tool to manage data in Dropbox workspace (based on official [dropbox-sdk-python](#)).

# CHAPTER 1

---

## Motivation

---

Get quick access to the user's Dropbox environment with intuitive commands.

# CHAPTER 2

---

## User Documentation

---

### 2.1 How to install

#### From PyPI (stable)

1. Create isolated Python environment `virtualenv venv` and activate it:

```
source venv/bin/activate
```

2. Install `dropme` with `pip`:

```
pip install dropme
```

3. Configure `dropme` client according to *Configuring* section

#### From GitHub (latest)

1. Clone `dropme` repository:

```
git clone https://github.com/tivaliy/dropme.git.
```

2. Configure `settings.yaml` file (in `dropme/settings.yaml`) or see *configuring* section.

```
token: YOUR_DROPBOX_ACCESS_TOKEN
```

3. Create isolated Python environment `virtualenv venv` and activate it:

```
source venv/bin/activate
```

4. Install `dropme` with all necessary dependencies:

```
pip install -r requirements.txt .
```

## 2.2 Configuring

### 2.2.1 Command Bash Completion

To add `dropme` command bash completion:

```
dropme complete | sudo tee /etc/bash_completion.d/gc.bash_completion
> /dev/null
```

Restart terminal and activate virtual environment once again.

### 2.2.2 Dropbox Access Token

To use the `dropme` client, you'll need to register a new app in the [App Console](#). Select Dropbox API app and choose your app's permission. You'll need to use the app key created with this app to access API v2. You have also to generate an [access token](#) for your own account through the [App Console](#).

There are several ways to specify Dropbox access token in `dropme` (the order of search matters):

- as an argument of a command:

```
dropme ls -l --token YOUR_DROPBOX_ACCESS_TOKEN
```

- as a environment variable:

```
export DBX_AUTH_TOKEN=YOUR_DROPBOX_ACCESS_TOKEN
```

- in `~/.config/dropme/settings.yaml` file

- in `dropme/settings.yaml` file

## 2.3 Common Usage

To get help on a specific `dropme` command enter:

```
$ dropme COMMAND --help
```

All `dropme` commands support several global arguments.

CLI tool for managing Dropbox environment.

```
dropme [--version] [-v | -q] [--log-file LOG_FILE] [--debug] [-t TOKEN]
```

#### **--version**

show program's version number and exit

#### **-v, --verbose**

Increase verbosity of output. Can be repeated.

#### **-q, --quiet**

Suppress output except warnings and errors.

#### **--log-file <LOG\_FILE>**

Specify a file to log output. Disabled by default.

#### **--debug**

Show tracebacks on errors.

**-t <TOKEN>, --token <TOKEN>**  
Dropbox access token.

The **dropme** client can run in two modes:

- as a standalone application:

```
$ dropme
(dropme) whoami
+-----+
| Field      | Value
+-----+
| user       | John Doe
| e_mail     | j.doe@example.com
| country    | UA
| account_type | basic
+-----+
(dropme) ls -l
+-----+
| type | size      | last_modified           | name
+-----+
| d   |           |                         | demo/
| d   |           |                         | foo/
| d   |           |                         | dummy/
| -   | 1.11 MB   | 2017-10-29 11:12:54 | Start work with Dropbox.pdf
| -   | 19.0 B    | 2017-11-17 12:41:29 | bar.txt
+-----+
```

- as a command with respective sub-command arguments:

```
$ dropme df
+-----+
| Field      | Value
+-----+
| allocated  | 2.0 GB
| used       | 326.19 MB
| available  | 1.68 GB (84.1%)
+-----+
```

## 2.4 Commands

The list of available **dropme** commands:

### 2.4.1 cp

Copies a file or folder to a different location in the user's Dropbox.

If the source path is a folder all its content will be copied. If destination path doesn't exist it will be created.

```
dropme cp
  [--allow-shared-folder]
  [-r]
  [--allow-ownership-transfer]
  from_path
  to_path
```

**--allow-shared-folder**

Whether or not allow to copy to a shared folder.

**-r, --auto-rename**

Whether the file should be renamed if there is a name conflict.

**--allow-ownership-transfer**

Allow moves by owner even if it would result in an ownership transfer for the content being moved. This does not apply to copies.

**from\_path**

Path to a file or folder in the user's Dropbox to copy.

**to\_path**

Destination path in the users's Dropbox. Will be createdif does not exist.

This command is provided by the dropme plugin.

## 2.4.2 df

Shows information about space usage of the current user's account.

```
dropme df
  [-f {json,shell,table,value,yaml}]
  [-c COLUMN]
  [--noindent]
  [--prefix PREFIX]
  [--max-width <integer>]
  [--fit-width]
  [--print-empty]
```

**-f <FORMATTER>, --format <FORMATTER>**  
the output format, defaults to table

**-c COLUMN, --column COLUMN**  
specify the column(s) to include, can be repeated

**--noindent**  
whether to disable indenting the JSON

**--prefix <PREFIX>**  
add a prefix to all variable names

**--max-width <integer>**  
Maximum display width, <1 to disable. You can also use the CLIFF\_MAX\_TERM\_WIDTH environment variable, but the parameter takes precedence.

**--fit-width**  
Fit the table to the display width. Implied if --max-width greater than 0. Set the environment variable CLIFF\_FIT\_WIDTH=1 to always enable

**--print-empty**  
Print empty table if there is no data to show.

This command is provided by the dropme plugin.

## 2.4.3 find

Searches for files and folders.

Note: Recent changes may not immediately be reflected in search results due to a short delay in indexing.

```
dropme find
  [-f {csv,json,table,value,yaml}]
  [-c COLUMN]
  [--quote {all,minimal,none,nonnumeric}]
  [--noindent]
  [--max-width <integer>]
  [--fit-width]
  [--print-empty]
  [--sort-column SORT_COLUMN]
  [--start START]
  [--max-results MAX_RESULTS]
  [-m {filename,filename_and_content,deleted_filename}]
  [path]
  query
```

**-f <FORMATTER>, --format <FORMATTER>**  
the output format, defaults to table

**-c COLUMN, --column COLUMN**  
specify the column(s) to include, can be repeated

**--quote <QUOTE\_MODE>**  
when to include quotes, defaults to nonnumeric

**--noindent**  
whether to disable indenting the JSON

**--max-width <integer>**  
Maximum display width, <1 to disable. You can also use the CLIFF\_MAX\_TERM\_WIDTH environment variable, but the parameter takes precedence.

**--fit-width**  
Fit the table to the display width. Implied if --max-width greater than 0. Set the environment variable CLIFF\_FIT\_WIDTH=1 to always enable

**--print-empty**  
Print empty table if there is no data to show.

**--sort-column SORT\_COLUMN**  
specify the column(s) to sort the data (columns specified first have a priority, non-existing columns are ignored), can be repeated

**--start <START>**  
The starting index within the search results (used for paging). Defaults to 0.

**--max-results <MAX\_RESULTS>**  
The maximum number of search results to return. Defaults to 100.

**-m <MODE>, --mode <MODE>**  
The search mode. Note that searching file content is only available for Dropbox Business accounts.

**path**  
The path of the directory to make search in, defaults to the root.

**query**  
The string to search for. The search string is split on spaces into multiple tokens. For file name searching, the last token is used for prefix matching (i.e. ‘bat c’ matches ‘bat cave’ but not ‘batman car’).

This command is provided by the dropme plugin.

## 2.4.4 get

Downloads a file at a given local path.

```
dropme get [--revision REVISION] DROPBOX_FILE [LOCAL_FILE]
```

**--revision <REVISION>**

The revision of a file.

**DROPBOX\_FILE**

The path of the file to download.

**LOCAL\_FILE**

The path of the file to save data, defaults to current working directory.

This command is provided by the dropme plugin.

## 2.4.5 ls

Lists directory content.

```
dropme ls
    [-f {csv,json,table,value,yaml}]
    [-c COLUMN]
    [--quote {all,minimal,none,nonnumeric}]
    [--noindent]
    [--max-width <integer>]
    [--fit-width]
    [--print-empty]
    [--sort-column SORT_COLUMN]
    [-l]
    [path]
```

**-f <FORMATTER>, --format <FORMATTER>**  
the output format, defaults to table

**-c COLUMN, --column COLUMN**  
specify the column(s) to include, can be repeated

**--quote <QUOTE\_MODE>**  
when to include quotes, defaults to nonnumeric

**--noindent**  
whether to disable indenting the JSON

**--max-width <integer>**  
Maximum display width, <1 to disable. You can also use the CLIFF\_MAX\_TERM\_WIDTH environment variable, but the parameter takes precedence.

**--fit-width**  
Fit the table to the display width. Implied if --max-width greater than 0. Set the environment variable CLIFF\_FIT\_WIDTH=1 to always enable

**--print-empty**  
Print empty table if there is no data to show.

**--sort-column SORT\_COLUMN**  
specify the column(s) to sort the data (columns specified first have a priority, non-existing columns are ignored), can be repeated

**-l, --long-listing**

Use a long listing format.

**path**

The path of the directory for printing its content. Defaults to the root.

This command is provided by the dropme plugin.

## 2.4.6 mkdir

Creates a folder at a given path.

```
dropme mkdir [-r] path
```

**-r, --auto-rename**

Whether the folder should be renamed if there is a name conflict.

**path**

The path of the folder to create.

This command is provided by the dropme plugin.

## 2.4.7 mv

Moves a file or folder to a different location in the user's Dropbox.

If the source path is a folder all its content will be moved. If destination path doesn't exist it will be created.

```
dropme mv
  [--allow-shared-folder]
  [-r]
  [--allow-ownership-transfer]
  from_path
  to_path
```

**--allow-shared-folder**

Whether or not allow to move to a shared folder.

**-r, --auto-rename**

Whether the file should be renamed if there is a name conflict.

**--allow-ownership-transfer**

Allow moves by owner even if it would result in an ownership transfer for the content being moved. This does not apply to copies.

**from\_path**

Path to a file or folder in the user's Dropbox to move.

**to\_path**

Destination path in the users's Dropbox. Will be createdif does not exist.

This command is provided by the dropme plugin.

## 2.4.8 put

Uploads a file to a specified directory.

If destination directory path doesn't exist it will be created.

## dropme, Release

---

```
dropme put [-r] [--chunk-size CHUNK_SIZE] file [path]
```

**-r, --auto-rename**

Whether the file should be renamed if there is a name conflict.

**--chunk-size <CHUNK\_SIZE>**

Chunk size of a file content to be uploaded per request in megabytes. Defaults to 10 MB. Note: A single request should not upload more than 150 MB.

**file**

The path to the file to upload.

**path**

The path of the directory to upload file, defaults to the root.

This command is provided by the dropme plugin.

## 2.4.9 restore

Restores file to a specified revision.

```
dropme restore -r REVISION path
```

**-r <REVISION>, --revision <REVISION>**

File revision.

**path**

The path to the file to restore.

This command is provided by the dropme plugin.

## 2.4.10 revs

Lists file revisions.

```
dropme revs
  [-f {csv,json,table,value,yaml}]
  [-c COLUMN]
  [--quote {all,minimal,none,nonnumeric}]
  [--noindent]
  [--max-width <integer>]
  [--fit-width]
  [--print-empty]
  [--sort-column SORT_COLUMN]
  [-m {path,id}]
  [-l LIMIT]
  path
```

**-f <FORMATTER>, --format <FORMATTER>**

the output format, defaults to table

**-c COLUMN, --column COLUMN**

specify the column(s) to include, can be repeated

**--quote <QUOTE\_MODE>**

when to include quotes, defaults to nonnumeric

**--noindent**  
whether to disable indenting the JSON

**--max-width <integer>**  
Maximum display width, <1 to disable. You can also use the CLIFF\_MAX\_TERM\_WIDTH environment variable, but the parameter takes precedence.

**--fit-width**  
Fit the table to the display width. Implied if --max-width greater than 0. Set the environment variable CLIFF\_FIT\_WIDTH=1 to always enable

**--print-empty**  
Print empty table if there is no data to show.

**--sort-column SORT\_COLUMN**  
specify the column(s) to sort the data (columns specified first have a priority, non-existing columns are ignored), can be repeated

**-m <MODE>, --mode <MODE>**  
The revisions for a given file path or id. Defaults to ‘path’. Note, that in the ‘path’ mode, all revisions at the same file path as the latest file entry are returned. If revisions with the same file id are desired, then mode must be set to ‘id’ (useful to retrieve revisions for a given file across moves or renames).

**-l <LIMIT>, --limit <LIMIT>**  
The maximum number of revision entries returned. Defaults to 10.

**path**  
The path to the file to get the revisions of.

This command is provided by the dropme plugin.

## 2.4.11 rm

Deletes a file or a folder at a given path.

If the path is a folder, all its content will be deleted too.

```
dropme rm path
```

**path**  
The path of the file or folder to delete.

This command is provided by the dropme plugin.

## 2.4.12 status

Shows status of a specified file or folder.

```
dropme status
[-f {json,shell,table,value,yaml}]
[-c COLUMN]
[--noindent]
[--prefix PREFIX]
[--max-width <integer>]
[--fit-width]
[--print-empty]
[-i]
[-d]
```

```
[ -m ]  
path
```

**-f** <FORMATTER>, **--format** <FORMATTER>  
the output format, defaults to table

**-c** COLUMN, **--column** COLUMN  
specify the column(s) to include, can be repeated

**--noindent**  
whether to disable indenting the JSON

**--prefix** <PREFIX>  
add a prefix to all variable names

**--max-width** <integer>  
Maximum display width, <1 to disable. You can also use the CLIFF\_MAX\_TERM\_WIDTH environment variable, but the parameter takes precedence.

**--fit-width**  
Fit the table to the display width. Implied if --max-width greater than 0. Set the environment variable CLIFF\_FIT\_WIDTH=1 to always enable

**--print-empty**  
Print empty table if there is no data to show.

**-i, --include-media-info**  
Show media info for file with photo or video content.

**-d, --include-deleted**  
Fetch data for deleted file or folder.

**-m, --include-has-members**  
Indicate whether or not file has any explicit shared members

**path**  
The path to the file to get metadata.

This command is provided by the dropme plugin.

## 2.4.13 whoami

Shows information about the current user's account.

```
dropme whoami  
[-f { json, shell, table, value, yaml }]  
[-c COLUMN]  
[--noindent]  
[--prefix PREFIX]  
[--max-width <integer>]  
[--fit-width]  
[--print-empty]  
[-a]
```

**-f** <FORMATTER>, **--format** <FORMATTER>  
the output format, defaults to table

**-c** COLUMN, **--column** COLUMN  
specify the column(s) to include, can be repeated

---

```
--noindent
    whether to disable indenting the JSON

--prefix <PREFIX>
    add a prefix to all variable names

--max-width <integer>
    Maximum display width, <1 to disable. You can also use the CLIFF_MAX_TERM_WIDTH environment
    variable, but the parameter takes precedence.

--fit-width
    Fit the table to the display width. Implied if --max-width greater than 0. Set the environment variable
    CLIFF_FIT_WIDTH=1 to always enable

--print-empty
    Print empty table if there is no data to show.

-a, --all
    Show information about account in more details.
```

This command is provided by the dropme plugin.

# CHAPTER 3

---

## Release Notes

---

### **3.1 1.1.0**

Released on Dec 25, 2017.

- New `dropme revs` command
- New `dropme restore` command
- Bug fixes

### **3.2 1.0.1**

Released on Dec 18, 2017.

# CHAPTER 4

## D

**DROPBOX\_FILE**  
    dropme-get command line option, 10

dropme command line option  
    --debug, 6  
    --log-file <LOG\_FILE>, 6  
    --version, 6  
    -q, --quiet, 6  
    -t <TOKEN>, --token <TOKEN>, 6  
    -v, --verbose, 6

dropme-cp command line option  
    --allow-ownership-transfer, 8  
    --allow-shared-folder, 7  
    -r, --auto-rename, 8  
    from\_path, 8  
    to\_path, 8

dropme-df command line option  
    --fit-width, 8  
    --max-width <integer>, 8  
    --noindent, 8  
    --prefix <PREFIX>, 8  
    --print-empty, 8  
    --c COLUMN, --column COLUMN, 8  
    -f <FORMATTER>, --format <FORMATTER>, 8

dropme-find command line option  
    --fit-width, 9  
    --max-results <MAX\_RESULTS>, 9  
    --max-width <integer>, 9  
    --noindent, 9

    --print-empty, 9  
    --quote <QUOTE\_MODE>, 9  
    --sort-column SORT\_COLUMN, 9  
    --start <START>, 9  
    --c COLUMN, --column COLUMN, 9  
    -f <FORMATTER>, --format <FORMATTER>, 9  
    -m <MODE>, --mode <MODE>, 9  
    path, 9  
    query, 9

dropme-get command line option  
    --revision <REVISION>, 10  
    DROPBOX\_FILE, 10  
    LOCAL\_FILE, 10

dropme-ls command line option  
    --fit-width, 10  
    --max-width <integer>, 10  
    --noindent, 10  
    --print-empty, 10  
    --quote <QUOTE\_MODE>, 10  
    --sort-column SORT\_COLUMN, 10  
    --c COLUMN, --column COLUMN, 10  
    -f <FORMATTER>, --format <FORMATTER>, 10  
    -l, --long-listing, 10  
    path, 11

dropme-mkdir command line option  
    -r, --auto-rename, 11  
    path, 11

dropme-mv command line option  
    --allow-ownership-transfer, 11  
    --allow-shared-folder, 11  
    -r, --auto-rename, 11  
    from\_path, 11  
    to\_path, 11

dropme-put command line option  
    --chunk-size <CHUNK\_SIZE>, 12  
    -r, --auto-rename, 12  
    file, 12  
    path, 12

dropme-restore command line option  
    -r <REVISION>, --revision <REVISION>, 12  
    path, 12

dropme-revs command line option  
    --fit-width, 13  
    --max-width <integer>, 13  
    --noindent, 12  
    --print-empty, 13  
    --quote <QUOTE\_MODE>, 12  
    --sort-column SORT\_COLUMN, 13  
    --c COLUMN, --column COLUMN, 12  
    -f <FORMATTER>, --format <FORMATTER>, 12  
    -l <LIMIT>, --limit <LIMIT>, 13  
    -m <MODE>, --mode <MODE>, 13  
    path, 13

dropme-rm command line option

path, 13  
dropme-status command line option  
  -fit-width, 14  
  -max-width <integer>, 14  
  -noindent, 14  
  -prefix <PREFIX>, 14  
  -print-empty, 14
